Shall We Have a Cotton Factory?

Every now and then some one raises why does not Richmond engage in the cotton mill industry? and has tried it and miserably failed. 'It is true that a cotton mill which was started it was operated with antiquated machinery, and it would have failed else there is no reason why a cotton factory in Richmond should not pay if equipped operated upon business principles. Danville has made the industry pay enough to contain 90,000 spindles. and our information is that they will not be able to catch up even with cotton millings pay as well in Richmond as in Danville?

The reply usually is that Danville and further South are nearer to the fields is not the great advantage of Southern mills. Their success has been due it the main to modern machinery, reliable labor and good climate. Richmond has the climate and the labor

and she is in position to put up the best equipped mill in the United States, for she can buy the latest improved machinery, She is at some distance from than Southern towns for raw cotton, but duct, and this advantage would more than compensate for her remoteness from

Our special purpose in bringing this subject forward to-day is to announce nterprising men of Richmond that we are advised that a New England of locating a cotton mill in the South, and that he can probably be induced to start with a capital of \$350,000. Upon failure to pay, he is sent to jail, and then required to work upon the streets until the fine is paid.

As a result, there is no lonfers' club now in the town of Culpeper, and tramps give it a wide berth. That should be the course adopted by every city and town in the State. In this day of activity there is no excuse for idleness, and th man who loafs around or who tramps from from place to place, begging his bread, can plead no excuse and should be dealt with as a public nuisance.
